

Aimaan Global Consulting

SharePoint Integration with legacy Delphi application

Customer Country:

Australia

Industry: Professional Services

"Enterprise Application Integration using Web Services is the smart way of giving life to legacy application" - Vivek, CTO, Aimaan Global Consulting

Microsoft Office SharePoint 2007 is the integrated ECM solution that helps the business to overcome the collaborative business process challenges and move forward.

Situation

DataMystic wants to access the collection of organization documents residing inside the Microsoft Office SharePoint (MOSS) 2007 system from the legacy application based on Delphi. DataMystic needs to enhance the productivity of the employees without adding new application and by leveraging the existing IT investment to access the documents in the new enterprise content management system based on MOSS 2007.

DataMystic has the technology challenge of integrating MOSS 2007 applications with legacy application to improve business process and achieve maximum efficiency. The solution should satisfy the business requirements that the number of MOSS 2007 applications will be growing and also have to accommodate future business changes.

Solution

Aimaan Global Consulting has implemented Enterprise Application Integration (EAI) solution to solve the integration challenges of DataMystic. Aimaan Global Consulting provided enterprise application integration

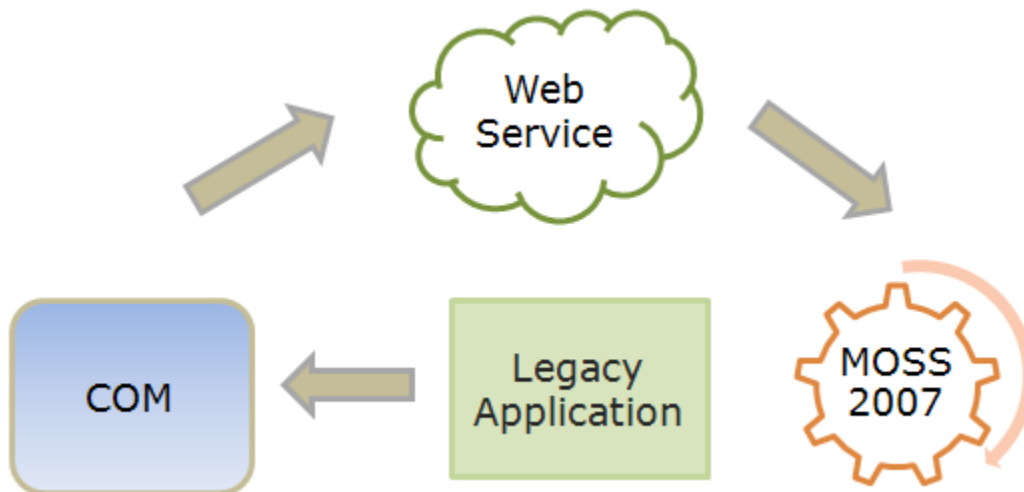

Software

Microsoft Office SharePoint 2007, Microsoft SQL Server 2005, Delphi5/7, .Net 3.5.

solution based on data by integrating MOSS 2007 with Delphi based legacy application using MOSS 2007 Web Services.

Business Process Improvement

The innovative EAI solution implemented by Arimaan Global Consulting greatly improves the existing business process without making significant changes in the legacy application. This result of process improvement enhances the business performance.

Implemented EAI Solution

Leveraging existing IT investments

The integration of Delphi based legacy application with MOSS 2007 has made to leverage the existing investment by seamlessly accessing the documents residing in MOSS 2007. This has resulted in maximizing the business value.

Benefits

Makes it simple and easy to use

The user friendliness and simple user interface improve the process by eliminating the human error and providing easy access to required information.

Less complexity and more productivity

The implemented EAI solution has improved the productivity without the process complexity of switching multiple user interfaces and log in multiple times.

Improves user satisfaction

The EAI solution has eliminated the need of using altogether different user interfaces such as combining web client with desktop application. This simplified user environment improves user satisfaction.

Customer Profile

DataMystic is the creator of award winning data integration and analysis products. DataMystic's product provide solutions for industries such as banking, finance, publishing house, government, manufacturing, health, law and education.
