

Microsoft ASP.NET Case Study

Arimaan Global Consulting

State-of-art high performance web application based on ASP.NET 3.5

Customer Country: Spain

Industry: Professional Services

Microsoft ASP.NET is an enterprise framework for building complex and mission critical web-based applications.

Situation

Virtus360 is looking for technical experts with exceptional Microsoft .NET experience and proven ability to outsource part of their application development requirements. The critical criteria of Virtus360 are that the application development partner should be the trusted IT Services Company with deep domain knowledge.

The business requirement of Virtus360 is complex and challenging which requires secure, scalable and flexible framework on which the entire application to be developed. This expects great amount of operational excellence on the part of technology outsourcer and mature software process to deliver flawless output and business value.

Arimaan's domain expertise combined with proven technical experience is the deciding factor for Virtus360 to select Arimaan as the preferred application development partner. Technical associate of Arimaan Global Consulting is awarded Most Valuable Professional (MVP) in Microsoft ASP.NET and SharePoint for the technical expertise and exceptional contribution to the technical community by Microsoft. This makes Arimaan Global Consulting to stand apart from the competitors.

Helping you to stay ahead of competition with our superior business solutions.
